

Office Memorandum • UNITED STATES GOVERNMENT

TO : CH/D/S
FROM : Population & Manpower
SUBJECT: used Foreign terms of measurements.

DATE:

The Principal problem in S/PM concerns conversion of the metric system.

We use measurements for area and volume of production such as

Hectare = 2.47 acres

metric ton = 2204 lbs

centner = $\frac{1}{10}$ of metric ton

Kilogram = $\frac{1}{100}$ of centner

These are the main terms used so far.
